

Ryan Johnson

Web Developer

I am a Web Developer working with multiple technologies including HTML, CSS, Javascript, React, Redux, Typescript, Git/Github, Bootstrap, Firebase, Photoshop, and always continuing to learn more! I have an eye for design and color theory, and I place a high importance on clean and dry code, in order to make everything intuitive and readable. Please take a look at my portfolio to see examples of my work.

- React
- Javascript
- Typescript
- Redux
- HTML
- CSS
- Git/Github
- Firebase
- Photoshop

Experience

2021 - 2022

Collabtech Group | 7645 E Ray Rd #125, Mesa, AZ 85212

Collaboration Technician

I delivered comprehensive email-based product support to the company's partners, Logitech and Lenovo. My responsibilities encompassed diagnosing and troubleshooting a wide range of video conferencing solutions and collaboration technologies. This included addressing issues related to cameras, touch panel accessories, microphones, computing units, and various other components essential to their operations.

2019 - 2021

BCBS of AZ | 2444 W Las Palmaritas Dr, Phoenix AZ 85021

Website Support Specialist

I provided account support and assisted with password resets through phone and email channels, catering to users of Blue Cross Blue Shield of Arizona's primary website, azblue.com. Additionally, I facilitated the reporting of website-related problems to the development team for further investigation and diagnosis.

2018 - 2019

Endurance International | 1500 N Priest Dr, Tempe AZ 85281

Web Advisor

I provided dedicated server-side website support and maintenance services tailored to medium to large-sized businesses. My responsibilities included various crucial tasks such as DNS management, SSL configuration, FTP assistance, and troubleshooting issues specifically related to WordPress CMS platforms.
